

Exercise : You are tasked with developing a web application that allows to enter the grades of students enrolled in courses.

- **Page of courses display :** this allows you to displays the list of courses (Figure 1). Each course has a “display students” link. Clicking on this link takes you to the grade entry page.
- **Page of grade entry :** this page displays the list of students associated with the chosen course (figure 2), with an input field for entering grades. Pressing the “validate” button saves the grades.

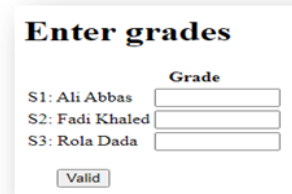

Display list of courses

C1: Web programming

C2: C programming

C3: Database
